

Metis Consulting Services: Data Management

About Metis

Metis is a women-owned, women-run consulting group focusing on strategic solutions within the GxP space. We specialize in consulting services for global biotech and pharmaceutical research communities.

What projects do we have the right to win?

At Metis, our Data Management Mission is to elevate the sponsor, site, and patient experiences through deliberate planning and collaborative consultation. Our focused study team produces higher-quality data with more dependable outcomes.

Data Management Services

Data Management for clinical trials is one of the most expensive undertakings by a biotech or pharma company. According to a 2016 study by Tufts University, the total cost of bringing a new drug to market was approximately 2.6 billion dollars. Source Data Verification (SDV) can account for up to 25% of the total clinical trial budget, while lack of established

data governance and management best practices results in 80% of data scientists' time spent assembling data and 20% in analysis.

According to the NIH, costs for data management and sharing include the following considerations for budgeting:

- Curating data
- Developing supporting documentation
- Formatting data according to accepted community standards, and transmission and storage for long-term preservation and access
- De-identification of data
- Preparing metadata for discoverability, interpretation, and reuse
- Local DM considerations (unique and specialized information infrastructure to provide management and preservation)
- Preserving and sharing data through established repositories (data deposit fees)
- Infrastructure costs - institutional overhead

AUDITS | DATA MANAGEMENT | PHARMACOVIGILANCE | QUALITY MANAGEMENT | REMS

- Routine conduct of research, including costs associated with collecting and gaining access
- Costs that are inconsistently charged as both direct and indirect costs

Metis offers the following services for Shared REMS programs: Trusted Advisory, PMO, audits, and education development.

For single REMS programs, Metis is a full-service provider.

Metis offers end to end guidance and services for RMPs.
